

# Astronomy 330

What do you do with it ?  
I think you're supposed to get in the back  
of it and make moaning noises !

This class (Lecture 22):

Communication

**Nicholas Leners**  
**Karna Gowda**

Next Class:

Future of Civilization

**Sean White**  
**Lindsay Elch**

Astronomy 330 Fall 2007

# Outline

- What does our number of civilizations mean?
- How can we communicate with ET?

Nov 8, 2007

Astronomy 330 Fall 2007

# Drake Equation

That's 333 advanced civilizations in our Galaxy!!!!!!!!!!!!

Frank Drake

$$N =$$

# of advanced civilizations we can contact in our Galaxy today

Nov 8, 2007

Astronomy 330 Fall 2007

# Drake Equation

That's 333 advanced civilizations in our Galaxy!!!!!!!!!!!!

Frank Drake

$$N = R_* \times f_p \times n_e \times f_l \times f_i \times f_c \times L$$

# of advanced civilizations we can contact in our Galaxy today

Star formation rate

Fraction of stars with planets

# of Earthlike planets per system

Fraction on which life arises

Fraction that evolve intelligence

Fraction that communicate

Lifetime of advanced civilizations

15 stars/yr

0.5 systems/star

$2.7 \times 0.134 = 0.36$  planets/system

0.95 life/planet

0.1 intel./life

0.40 comm./intel.

3250 yrs/comm.

Nov 8, 2007

Astronomy 330 Fall 2007

$= 2.5 \times 10^{11}$   
Communicating Civilizations

## Drake Equation For Optimist

62.5% of all stars in our Galaxy.

$$N = R_* \times f_p \times n_e \times f_l \times f_i \times f_c \times L$$

# of advanced civilizations we can contact

Rate of formation of Sun-like stars

Fraction of stars with planets

# of Earthlike planets per system

Fraction on which life arises

Fraction that evolve intelligence

Fraction that communicate

Lifetime of advanced civilizations

50

1

1

1

$5 \times 10^9$

Birthrate of 50/year!

Nov 1, 2007

$= 7.5 \times 10^{-6}$   
Communicating Civilizations

## Drake Equation For Pessimist

Must wait  $10^7$  years for one!

$$N = R_* \times f_p \times n_e \times f_l \times f_i \times f_c \times L$$

# of advanced civilizations we can contact

Rate of formation of Sun-like stars

Fraction of stars with planets

# of Earthlike planets per system

Fraction on which life arises

Fraction that evolve intelligence

Fraction that communicate

Lifetime of advanced civilizations

5

0.1

0.15

0.01

0.01

0.01

100

Birthrate of  $7.5 \times 10^{-8}$  /year!

Nov 1, 2007

$$= 9.3 \times 10^5$$

Communicating Civilizations

## Drake Equation For Average

$$N = R_* \times f_p \times n_e \times f_l \times f_i \times f_c \times L$$

# of advanced civilizations we can contact	Rate of formation of Sun-like stars	Fraction of stars with planets	# of Earthlike planets per system	Fraction on which life arises	Fraction that evolve intelligence	Fraction that communicate	Lifetime of advanced civilizations
10	10	0.5	0.89	0.5	0.7	0.6	$1 \times 10^6$
Birthrate of 0.93 /year!							

Nov 1, 2007

## Hmm..

- None of these results are wrong.
- The average results of around 1/year would suggest that any life that is contacted is presumable older and therefore more advanced.
- It is interesting to note that for our values lifetimes greater than around 90 years, gives more than 10 civilizations with which to talk.
- Our number was **3250** years.

Nov 1, 2007

Astronomy 330 Fall 2007

## Distance to Nearest Neighbor

- Assume that the alien civilizations are uniformly scattered in our galaxy and  $N > 8000$ .
- We can then assume spherical volume to find ET, i.e. flatness of Galaxy not an issue.

Nov 1, 2007

Astronomy 330 Fall 2007

## Distance to Nearest Neighbor

- Assume  $N > 8000$

$$\frac{\text{Average Galactic Volume}}{\text{Number of Civilizations}} = \frac{\pi r_{\text{galaxy}}^2 h_{\text{galaxy}}}{N} = \text{alien density}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N > 8000$

$$\text{alien density} = \frac{\pi r_{\text{galaxy}}^2 h_{\text{galaxy}}}{N} = \frac{7.85 \times 10^{12} \text{ lyrs}^3}{N}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N > 8000$

$$\text{alien density} = \frac{\pi r_{\text{galaxy}}^2 h_{\text{galaxy}}}{N} = \frac{7.85 \times 10^{12} \text{ lyrs}^3}{N}$$

$$\text{search volume} = \frac{4}{3} \pi r^3$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N > 8000$

$$\frac{4}{3} \pi r^3 = \frac{7.85 \times 10^{12} \text{ lyrs}^3}{N}$$

$$\text{search volume} = \frac{4}{3} \pi r^3$$

$$\text{alien density} = \frac{\pi r_{\text{galaxy}}^2 h_{\text{galaxy}}}{N}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N > 8000$

$$\text{Then } r \approx \frac{12000 \text{ ly}}{N^{\frac{1}{3}}}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume that the alien civilizations are uniformly scattered in our galaxy and  $N < 8000$ .
- Then, the flatness of Galaxy is an issue.

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N < 8000$

$$\frac{\text{Average Galactic Volume}}{\text{Number of Civilizations}} = \frac{\pi r^2 h_{\text{galaxy}}}{N} = \text{alien density}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N < 8000$

$$\pi r^2 h_{\text{galaxy}} = \frac{7.85 \times 10^{12} \text{ lyrs}^3}{N}$$

Nov 1, 2007

Astronomy 330 Fall 2007

# Distance to Nearest Neighbor

- Assume  $N < 8000$

Then  $r \approx \frac{50000 \text{ ly}}{N^{\frac{1}{2}}}$

Nov 1, 2007

Astronomy 330 Fall 2007

## The Neighbors

We need to look at every star within  $\sim 3000$  lys for one detection!

Using  $N=333$

Nov 1, 2007

Astronomy 330 Fall 2007

## Interesting Points

1. We assumed uniform density of civilizations.
  - Underweights the galactic center, but maybe that's okay— supernovae.
2. Distance away is the average.
  - Could be closer, but unlikely to be much closer.
3. Note that  $r$  is better defined than  $N$ .
  - $R$  depends on  $N^{1/2}$  or  $N^{1/3}$ .
  - If we are wrong in  $N$  by a factor of 100, then only off in  $r$  by factors of 10 or 4, respectively.
4. For communication, it may be that the distance there and back is longer than  $L$ .

Nov 1, 2007

Astronomy 330 Fall 2007

## How to Communicate?

- Okay, our estimate is optimistic.
- So, how do we go about detecting our neighbors?
- Are we seriously sending out messages now?
- No.

Nov 1, 2007

Astronomy 330 Fall 2007

## How to Communicate?

- We are relatively a young civilization, with radio technology for only a hundred years.
- Right now, we are mostly a passive “lurker” civilization.
- Okay, so what will an advanced civilization use?
- Hard to figure out.. They are aliens!

Nov 1, 2007

Astronomy 330 Fall 2007

# Light me up

- Visible light is only a tiny portion of the full electromagnetic spectrum
- Red light has longer wavelength and lower frequency than blue light.
- Divisions between regions are from biology or technologies.
